

Project Executable Files

Date	18 JULY 2026
Team ID	SWTID-2026-4144
Project Name	RISING WATERS
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete source code (all files and folders)	YES
2	README / Setup Guide (instructions to run the project)	YES
3	requirements.txt / package.json / dependency file	YES
4	Database schema / seed files (if applicable)	YES
5	Environment configuration file (.env.example or similar)	YES
6	Deployed aYESpplication URL (if hosted)	NA
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	YES

10	Demo video or walkthrough (if required)	YES
----	---	-----

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

RISING-WATERS/

```

|
├── src/           - Source code files (HTML, CSS, PHP, JS)
├── tests/         - Test files & test case results
├── docs/          - Documentation, screenshots & project report
├── config/        - Configuration files (.env.example, db_config.php)
├── database/      - Database schema.sql & seed files
├── README.md      - Setup and run instructions
├── requirements.txt - Python dependencies (if any)
└── package.json   - Node dependencies (if used)
  
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not Deployed/Runs on Local host :http://localhost/rising-waters/
Login Credentials (Demo)	Vishnupriya0542@gmail.com password:Vishnupriya@2005
Platform / Hosting Provider	Local host using XAMPP/WAMP
Repository Link	https://github.com/vishnu25676/Rising-waters-2026
Demo Video Link	Not prepared

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

1. XAMPP / WAMP Server installed with PHP 8.0+ & MySQL
2. Web Browser: Chrome / Edge / Firefox
3. Git installed, for cloning the repository

Step-by-step to run locally:

1. *Clone the repository*: ``git clone https://github.com/your-team-name/rising-waters.git``
2. *Move the project*: Copy the `rising-waters` folder to `htdocs/` in XAMPP or `www/` in WAMP

3. ***Setup Database***: Open `http://localhost/phpmyadmin` → Create DB named `rising\_waters\_db` → Import `database/schema.sql`
4. ***Configure environment***: Update DB credentials in `config/db\_config.php` if needed
5. ***Start server***: Open XAMPP Control Panel → Start `Apache` + `MySQL`
6. ***Run application***: Open browser and go to `http://localhost/rising-waters/`
7. ***Login***: Use demo credentials → Username: `admin@risingwaters.com` | Password: `Admin@123`

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Project runs only on local host,not deployed on cloud	Can be accessed by placing files in XAMPP htdocs folder .
2	Real-time sensor data is simulated ,not from actual hardware	User dummy data+JSON files to demonstrates alert
3	Internet connectivity required for map/ dashboard widgets	Added offline dummy data backup to continue demo without interruption
