

Project Initialization and Planning Phase

Date	17 JULY 2026
Team ID	SWTID-2026-4144
Project Name	RISING WATERS
Maximum Marks	3 Marks

Define Problem Statements (Problem Statement Template):

Floods are one of the most frequent and destructive natural disasters , especially in low-lying in coastal regions . Traditional flood warning systems rely on manual monitoring and historical data , which often leads to alerts , inaccurate predictions, and insufficient evacuation time. As a result, communities face loss of life, property damage,crop destruction, and economic disruptions.

Example:

A resident near a river

Stay safe during heavy rains

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A farmer	Protect crops and lives	Floods occur unexpectedly.	Weather monitoring concerned	About financial loss.
